

BLISTER PACKS

Blister packs ("blisters") are custom thermoformed shells of clear plastic molded to the shape of your products.

- Blisters and products can be sealed onto a printed backer card.
- They are usually custom designed to enhance product marketability.
- Depending on the products, blisters can be thermoformed to position many components: products, accessories, and advertising.
- They are a cost effective packaging solution that can be produced within a quick turnaround time.
