

## DISPLAY TRAYS

Display trays are custom designed to hold and showcase a wide variety of retail products such as cosmetics, toys etc. Display trays can be designed with the exact material, gauge, and colors desired to complement and protect your products.

## INSERT TRAYS

Insert trays are custom formed to hold your product and are inserted into another type of package such as a box or clamshell.

- Insert trays are an ideal solution for holding many different size products in place within an outer container.
- Insert trays provide support and protection.

## MEDICAL TRAYS

Medical trays protect the product, withstand sterilization, and lengthen product shelf life. They can be produced in medical grade plastics as an option.

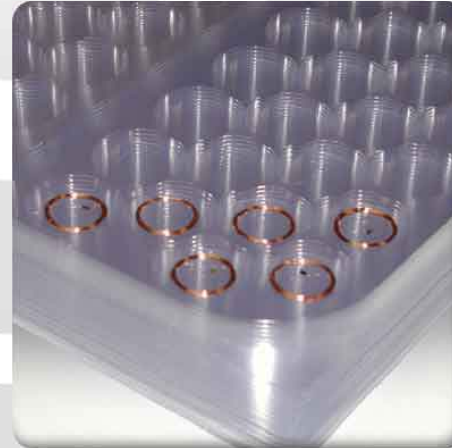

## WIP TRAYS

Work in progress trays are custom designed to effectively organize, protect and hold your products in place.

- WIP trays are an ideal solution for safely moving small parts and components from one location to another, damage free.
- WIP trays can be produced in one-way disposable or heavier re-usable material. Anti-static and static dissipative plastics can be used for electronic applications.
- WIP trays can be designed with lids or snap devices, or as stackable units.
